

10 March 1953

Dr. Walter F. Colby  
Director of Intelligence  
Atomic Energy Commission  
Room 235  
1901 Constitution Avenue  
Washington, D. C.

Dear Sir:

You may recall that in March of 1952 a briefing on the Central Intelligence Agency was given for the benefit of key officers in each of the intelligence agencies. It was believed that better understanding of the activities of this Agency on the part of the members of the community would facilitate our cooperative undertakings which are necessary in so many fields.

As there have been a number of personnel changes in each of the intelligence agencies since that briefing, and as some present key officials could not attend last year, a similar briefing has been arranged for Tuesday, 7 April, at 1400.

Four chairs will be reserved for the Atomic Energy Commission on 7 April. It is suggested that you may wish to select members of your staff who are engaged in intelligence production, although those who have primarily administrative responsibilities might also benefit. Representatives of the other intelligence agencies and other interested persons will also be present.

This presentation will require that those present have Special Intelligence clearance. It would be appreciated if the names of your group would be sent to this office by 23 March.

Your representatives will be met at the steps of the Administration Building, CIA. The briefing will be in Room 117, Central Building.

Sincerely yours,

 25X1A9a  
Secretary  
Intelligence Advisory Committee
